

Marco Bogatu

ANALYST DEVELOPER

Passionate and highly motivated developer, always eager to acquire new skills and fully dedicated to software development projects.

Education

From 2017
to 2023

- **CESS - Technical IT Transition**
Ello (Formerly Institut Cardijn Lorraine) Arlon, LX, Belgium
 - **Computer Science Basics & Algorithms:** Learning programming fundamentals and discovering Object-Oriented Programming (OOP) through various practical exercises in C and Java.
 - **Software Development:** Design and implementation of various projects (websites, applications).

Since 2023

- **Bachelor's Degree in Application Development**
Haute École Robert Schuman Libramont, LX, Belgium
 - **Paradigms & Programming:** Deepening and mastery of Object-Oriented Programming (OOP) and exploration of new development paradigms.
 - **Architecture & Data:** Design and management of databases, as well as mastery of the fundamentals of IT infrastructure and computer networks.
 - **Academic Projects:** Design and implementation of concrete software projects, carried out both individually (autonomous management) and in teams (collaborative work and group methodologies) across various domains (website, applications, mobile applications, infrastructure, microservices).

Work experience

From 2024
to 2026

- **IT Section Representative**
Haute École Robert Schuman Libramont, LX, Belgium

Represented the IT department at major educational and career fairs (including the **SIEP** in Namur and **Objectif Métier** in Libramont).

My projects

- BookBox - Hers 2026** Academic mobile application designed to facilitate reading tracking within a family framework. Developed in **Kotlin** with a **Room** database.
- KineStat - Hers 2026** Takeover of a patient tracking application built in **C#** with **PostgreSQL** with another developer for deployment on **Windows Server** and **Docker**.
- DualDesk - Hers 2024** Academic student tracking application for HERS, developed in **Java** with **Spring Boot** in groups of six developers.
